

With regard to a long-term succession planning in our customer service, we are looking for a junior

Service-Technician (m/f)

Range of tasks:

- mounting and placing into operation of machines and plants
- customer advisory and service per phone as well as personally on site
- first-level support and troubleshooting
- arrange and hold product and application trainings
- run riveting trials and organise the infrastructure in our own testing lab

Your skills:

- technical, mechanical basic education is a must
- knowledge in machine building and tool making is an advantage
- knowledge in pneumatic-, hydraulic-, electric- and electronic-systems
- well experienced use of Microsoft office programs
- fluent in Chinese-Mandarin and English (spoken and written)
- availability for frequent travel in China (20-50%)
- some years of experience in a similar position
- age: 25 up to 40
- starting date: immediately

This interesting position implies flexibility, the ability to work under pressure, quality consciousness and in particular a customer focused way of thinking.

We are a Shanghai Based Subsidiary of a Swiss machine building company which is the market leader in fastening technology engineers, manufactures and distributes riveting machines worldwide. Over 47 years of experience, high-quality products and a global presence stands for the experience and competence of BalTec.

Have we awakened your interest? Then please send your CV in English with all relevant documentation to:
