

PRECISION PNEUMATIC PRESS

The accessories **MicroPress®** with square ram

MicroPress® is a pneumatic press for smaller capacities with a robust press base. MicroPress® types are ideal for joining and shaping applications where components require low pressure and precise stroke depth. Examples are applications in medical engineering, electronics manufacturing and precision mechanics.

Quality features:

- Square ram
- Precision ram guide
- Adjustable stroke length
- Height-adjustable press head
- Practically maintenance-free cylinder
- Low noise
