

MANUAL TOGGLE PRESSES

The accessories

Manual toggle presses with round ram APK T series presses with 250 mm throat

Wherever oversized components have to be processed, a larger throat is needed, for example to process PCB, sheet materials and similar pieces. For this purpose, Baltec XL presses with 250 mm throat are used.

The base is a durable welded construction on which the different standard press heads are mounted.

APK T-range

The extra powerful hand-operated toggle presses of the APK T 3 and APK T 4 ranges are especially suitable for the frequently changing applications in model making and in the workshop. Their high forces of up to 30 kN enable them to be flexibly used for widely differing applications.

The advantages:

- Choice of different stroke lengths
- Extra stable press base design
- Daylight easily adjustable by means of the standard press head threaded spindle height adjustment
- The nominal force of the press can be achieved with moderate applied force

XL-APKT range with 250 mm throat

A larger throat is required wherever bulky parts are processed, e.g. the processing of printed circuit boards, sheet metal and similar parts. Baltec XL presses with 250 mm throat are employed in such cases. The base is a stable welded structure to which different standard press heads can be fitted.
